

8. Chain of Responsibility Design Pattern

Wednesday, October 18, 2023 11:22 AM

Application Usage:

- ATM / Vending Machine
- Design Logger

Whenever a Sender sends a request and he doesn't care who will full its request

So when a request comes to Receiver OBJ1- it was not able to fulfill it

Receiver OBJ2 - it was again not able to fulfill it, so it delegates to next until some receiver will fulfill it.
